***Reasons for Allowance***

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a video management system configured to receive a video stream containing one or more video pictures with a method comprising the steps of accessing a video picture that is to be subsampled, pre-multiplying one block of the video picture, represented as a matrix, by a pre-multiplication matrix, the pre-multiplication matrix generated from a first subsample matrix that represents a subsampled decoding in a first direction, and post-multiplying the block matrix by a post-multiplication matrix generated from a second subsample matrix that represents the subsampled decoding in a second direction that is substantially perpendicular to the first direction.

It is noted that the closest prior art of record (Kondo US Patent no. 5,193,003) teaches a similar video management system, however, Kondo fails to particularly teach

or suggest "accessing a video picture that is to be subsampled, pre-multiplying one block of the video picture, represented as a matrix, by a pre-multiplication matrix, the pre-multiplication matrix generated from a first subsample matrix that represents a subsampled decoding in a first direction, and post-multiplying the block matrix by a post-multiplication matrix generated from a second subsample matrix that represents the subsampled decoding in a second direction that is substantially perpendicular to the first direction" as specified in the claims.
